SITE SECURITY CHECKLIST 4

1

INTRODUCTION

Construction job sites are at high risk of security threats including burglary, trespassing, vandalism and arson.

Construction sites contain many highly sought after materials and tools, many of which are easy to resell, making them a prime target for organised and opportunist theft.

Video Surveillance Cameras are an effective way of mitigating these threats, but there are several ways to tighten your security.

To assist site managers, the security experts at WCCTV have created the Ultimate Construction Job Site Security Checklist, a free guide that helps close the gaps in your security processes.

THE NATIONAL INSURANCE CRIME BUREAU AND
THE NATIONAL EQUIPMENT REGISTER REVEAL THE
COST OF CONSTRUCTION JOB SITE CRIME TO BE
BETWEEN \$300M AND \$1B ANNUALLY.

2

IMPROVING CONSTRUCTION JOB SITE SECURITY

It has never been more vital for construction companies to invest in job site security measures to protect their valuable assets and improve worker safety.

The benefits of enhancing your security measures will help:

Prevent the theft of tools and equipment

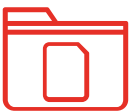

Protecting against project delays

Mitigating vandalism and arson of site property

Shielding your site from trespassing

Reducing onsite accidents and injuries that can result in litigation and legal claims

3

IDENTIFYING SECURITY THREATS

Although everyone who works across your sites has a responsibility to keep it secure, it's best to appoint a security lead from within your teams who can oversee all critical elements.

The person can ensure any existing or emerging security issues are dealt with in real-time, reported, and recorded for reference.

The best way to identify the threats your job site is likely to encounter is to perform a security risk assessment.

If you've never completed a security risk assessment before, WCCTV has created a free guide which you can download here: [A Comprehensive Guide to Construction Site Security](#).

THE ULTIMATE CONSTRUCTION JOB SITE SECURITY CHECKLIST

4

CONSTRUCTION JOB SITE SECURITY CHECKLIST

To guide you, here is a Construction Job Site Security checklist that you can use to analysis the site security of your construction site.

SECURITY COORDINATION	YES	NO
1. Does the site have designated security coordinators?		
2. Are the security coordinators available for contact during non-business hours?		
3. Does the construction job site provide a means to contact law enforcement, fire department, and other relevant authorities in case of emergencies?		
4. Does the construction job site have a written security plan, including procedures for specific scenarios?		
5. If so, are construction job site employees aware of the security plan?		

4

CONSTRUCTION JOB SITE SECURITY CHECKLIST

GENERAL MACHINERY	YES	NO
1. Are all machinery adequately marked? (Identification number, corporate logo, tags, etc.)		
2. Have all the machinery been inventoried? (Serial number, brand, model, value, etc.)		
3. Does the project have a list of the names of operators handling the machinery?		
4. Are all the machinery fitted with immobilisers and tracking devices when appropriate?		
5. Are all the machinery stored in a secure area with a proper surveillance system?		

TOOLS AND OTHER EQUIPMENT	YES	NO
1. Are all power tools and hand equipment marked? (Identification number, corporate logo, tags, etc.)		
2. Have all power tools and hand equipment been inventoried? (Serial number, brand, model, value, etc.)		
3. Are tools and equipment fitted with tags and tracking devices when appropriate?		
4. Are tools and equipment stored in a secure place?		

4

CONSTRUCTION JOB SITE SECURITY CHECKLIST

GENERAL MACHINERY	YES	NO
1. Are all machinery adequately marked? (Identification number, corporate logo, tags, etc.)		
2. Have all the machinery been inventoried? (Serial number, brand, model, value, etc.)		
3. Does the project have a list of the names of operators handling the machinery?		
4. Are all the machinery fitted with immobilisers and tracking devices when appropriate?		
5. Are all the machinery stored in a secure area with a proper surveillance system?		

TOOLS AND OTHER EQUIPMENT	YES	NO
1. Are all power tools and hand equipment marked? (Identification number, corporate logo, tags, etc.)		
2. Have all power tools and hand equipment been inventoried? (Serial number, brand, model, value, etc.)		
3. Are tools and equipment fitted with tags and tracking devices when appropriate?		
4. Are tools and equipment stored in a secure place?		

4

CONSTRUCTION JOB SITE SECURITY CHECKLIST

INVENTORY CONTROL	YES	NO
1. Is there a system in place to check material inventory to ensure they are not misplaced or stolen?		
2. Are there procedures in place for checking materials that go in and out of the construction site?		
3. Is there a set schedule for checking materials and equipment?		
4. If so, do the records show that the schedule is followed strictly?		
5. Are all material suppliers arriving for delivery properly identified? (e.g license plates, driver's license, etc)		

LIGHTING AND SURVEILLANCE	YES	NO
1. Is there sufficient lighting on the construction site?		
2. Is there a dedicated staff member assigned to check if the lighting is working properly?		
3. Is the site protected by CCTV cameras?		
4. Are there signs posted on site indicating the presence of security cameras?		
5. Are there motion detection lights installed on-site?		

4

CONSTRUCTION JOB SITE SECURITY CHECKLIST

INVENTORY CONTROL	YES	NO
1. Is there a physical barrier in place to secure the site?		
2. Is the number of gates kept to a minimum?		
3. Are there uniformed guards at every gate to check personnel and vehicles entering and leaving the site?		
4. Are security warnings displayed prominently at all entry points?		
5. Are entry points adequately secured? (With industry-grade padlocks, steel chains, etc.)		
6. Is there an alarm system?		
7. Is the locking system integrated with the alarm?		
8. Is the site perimeter regularly inspected?		
9. Are "NO TRESPASSING" signs displayed prominently along the perimeter?		

4

CONSTRUCTION JOB SITE SECURITY CHECKLIST

INTERNAL CONTROLS	YES	NO
1. Is there a policy on employee theft?		
2. Are employees aware of the policy?		
3. Are employees required to check in and check out company properties when using them?		
4. Are staff members encouraged to report suspicious activity?		
5. Is there a hotline employees can call to report security lapses and breaches?		

SITE VISITORS	YES	NO
1. Are visitors checking in and out?		
2. Are vehicles entering and exiting the site recorded?		

WCCTV: MANAGED SURVEILLANCE CAMERAS FOR CONSTRUCTION SITES

WCCTV is the USA's leading supplier of mobile surveillance cameras for construction job sites.

We provide market-leading security cameras backed by a fully managed service that includes equipment installation, video monitoring, maintenance, and ongoing technical support.

Our rapid-deployment, portable cameras provide construction sites with multi-application benefits, including security, time lapse video filming, and remote project management.

Our customizable solutions can accommodate any site, and easily function whether you have power or are dependent on solar energy. All of our units contain 4G LTE transmission technology – allowing these solutions to operate autonomously.

No matter the site, we have a solution that we can create for you.
