WCCTV 4G IR MINI DOME +

WCCTV's 4G IR Mini Dome + is a rapid deployment pole camera specifically designed for mobile video surveillance applications, including construction site security, parking lot protection and oil and gas facilities surveillance. As an all-in-one video surveillance solution, it combines an infrared PTZ camera, 4TB's of onboard recording capacity, and wireless transmission technology into a portable, lightweight unit.

The system is easy to install onto a utility pole or building, is easy to maintain, and can easily be moved to a new location to target crime hotspots or if your surveillance requirements change.

Live and recorded footage can be accessed via 4G LTE, allowing users to connect remotely anytime via any device. The WCCTV 4G IR Mini Dome+ also contains video analytics features to provide intelligent video surveillance, and built-in auto-tracking functionality for automated monitoring.

The unit features three additional input channels, allowing the addition of secondary cameras such as LPR cameras, secondary PTZ cameras or static cameras for Time Lapse Video applications. Secondary cameras can share the recording capacity and LTE connectivity of the 4G IR Mini Dome.
