WCCTV 4G MINI DOME AND LPR

WCCTV's combined rapid deployment pole camera and LPR system utilizes a WCCTV Pole Camera's additional input channels to integrate a specialized License Plate Recognition Camera.

This unique all-in-one mobile video surveillance system combines all the benefits of WCCTV's pole camera range with automatic license plate recognition technology for crime reduction and security applications.

The system harnesses the 4G LTE, local recording (up to 4TB), and 360° PTZ field of vision of the WCCTV Mini Dome to provide a complete situational overview. Simultaneously, the LPR camera delivers crystal-clear images of license plates in all weather and lighting conditions.

The LPR camera captures and stores images of license plates and converts them into a text database.

This database can be accessed and downloaded remotely, providing complete statistical analysis and/or allowing the searching of a license plate or activity during a specific period.

The WCCTV Mini Dome + LPR is ideal for security and project management applications, including data collection along highways, entrances to buildings, job sites, or other secure facilities. It is also an ideal crime-fighting tool against illegal dumping and traffic or commercial parking lots.

The camera can read license plates day and night in any weather conditions on vehicles traveling up to 130mph.
